Who is Lakwell?

Lakwell Solar is a pioneering renewable energy generation company with a reputation for integrity, quality, and excellence in industrial solutions. Our extensive client base will attest to the quality and after-sale services rendered by us. We are regarded as one of the best structured and integrated solar power companies in the business.

Lakwell Solar's Sustainable Energy

Lakwell Solar integrates all aspects of energy efficient technology to reduce your electricity consumption and save you money. We work with you to understand your individual needs and identify ways to improve the energy efficiency of your home, business or company.

Our Vision

To be the most trusted renewable energy solutions provider in Sri Lanka.

Our Mission

To be the most trusted renewable energy solutions provider by offering high quality, cost effective products, whilst delivering best-in-class after sales service and superior customer care; thus, meeting stakeholder expectations and contributing towards green energy development in Sri Lanka.

OUR BRAND PROMISE

Each day, the sun gives off far more energy than what we require to power everything on Earth and this solar power is the key to a clean energy future. It is the solution to many of the energy related issues, and that is why we are taking a stand towards optimizing this natural resource. Our futuristic approach to renewable energy generation is fueled by a deep passion for conservation of our planet. As a progressive company looking towards the future of energy solutions, Lakwell Industries is committed to advocating the use of Solar Energy generation as a more economically viable, sustainable source of renewable energy. We pursue solar energy technologies that leverage our company's strengths and which can be deployed with competitive economic returns to our clients. Long term sustainability, energy independence, and more transparent energy bills are amongst the many guaranteed benefits offered to our clients through solar energy solutions.

Why Choose Lakwell Solar?

One of the nation's most experienced

Lakwell Solar is a Sri Lankan-owned company with offices in Sri Lanka, Maldives, Seychelles, Cambodia, and Dubai. With decades of experience in solar energy, we have unmatched industry experience and product knowledge.

Excellent customer reviews & Track record

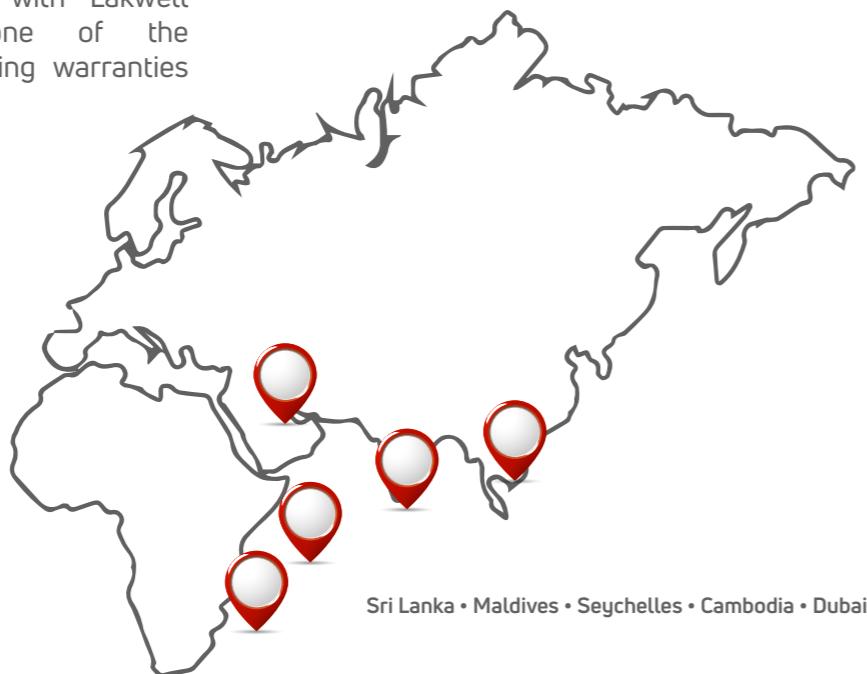

The feedback from our clients attest to our excellent service.

Dedicated customer support Worldwide

The ultimate peace of mind is that Lakwell Solar will be here for you now and into the future. Top manufacturers choose to partner with us because of our heavy investment in customer service and the good reputation of our technical service department.

Quality & Longevity Guarantee

We select the best products on the market for our installations and back them up with Lakwell Solar's Longevity Guarantee, one of the most comprehensive and long-lasting warranties in the industry.

No upfront costs, no deposits & No lock-in contracts

Unlike most other solar companies, Lakwell Solar takes no down payments or deposits until your solar power system is delivered and installed.

The best largest solar repairs & service network in the region

Lakwell Solar has the largest solar after sales network in the region spanning Sri Lanka, Maldives, Seychelles, Cambodia, and Dubai.

No upfront fee, interest-free payment options

You can save while you pay off your system with our zero upfront fee options. This way, you pay nothing today and enjoy great solar savings in an instant.

“
Solar energy
Today’s resource
for a brighter
tomorrow. ”

5 reasons to choose solar.

Why solar power makes sense

You've been weighing up whether to invest in solar power for a while now but still aren't fully convinced? We understand it's not a decision to be taken lightly. Yet, with compelling benefits like these, it really does make sense to switch to solar.

1

Save money on your bills

Having the right solar power system on your roof can reduce or even eliminate your entire electricity bill. We work closely with you to assess your power needs, understand your budget and choose a solar power system that delivers maximum savings.

2

Good for the environment

Installing solar panels on your roof is one of the easiest and most practical ways of contributing to a sustainable future. Even by installing a small 1 kW solar power system, you have the potential to save around 1.5 tonnes of carbon from being released into the atmosphere every year.

3

Add value to your home

As more individuals see the value of solar power, having a good quality solar power system on your roof adds instant desirability and value.

4

Utilise government incentives

There are still plenty of government incentives which add up to thousands of rupees saved over the life of your system. We can help you make the most of these incentives to ensure you are saving as much money as possible.

5

Protection against rising energy prices

Unfortunately, the cost of power continues to rise. By installing a solar power system in your home, you will be producing free electricity, effectively shielding yourself from rising energy prices.

A tailored solution that's right for you

Designing a solar power solution to suit your household can be complex. We assess your roof, bills & budget to establish the best option to fit your needs.

Value Range

Reputable brands at a good price. Consider our value product range, which is a more cost-effective option, adding value to your home or business with a shorter payback period, allowing you to reap the benefits of solar while you are at the property, without breaking the bank.

Premium Range

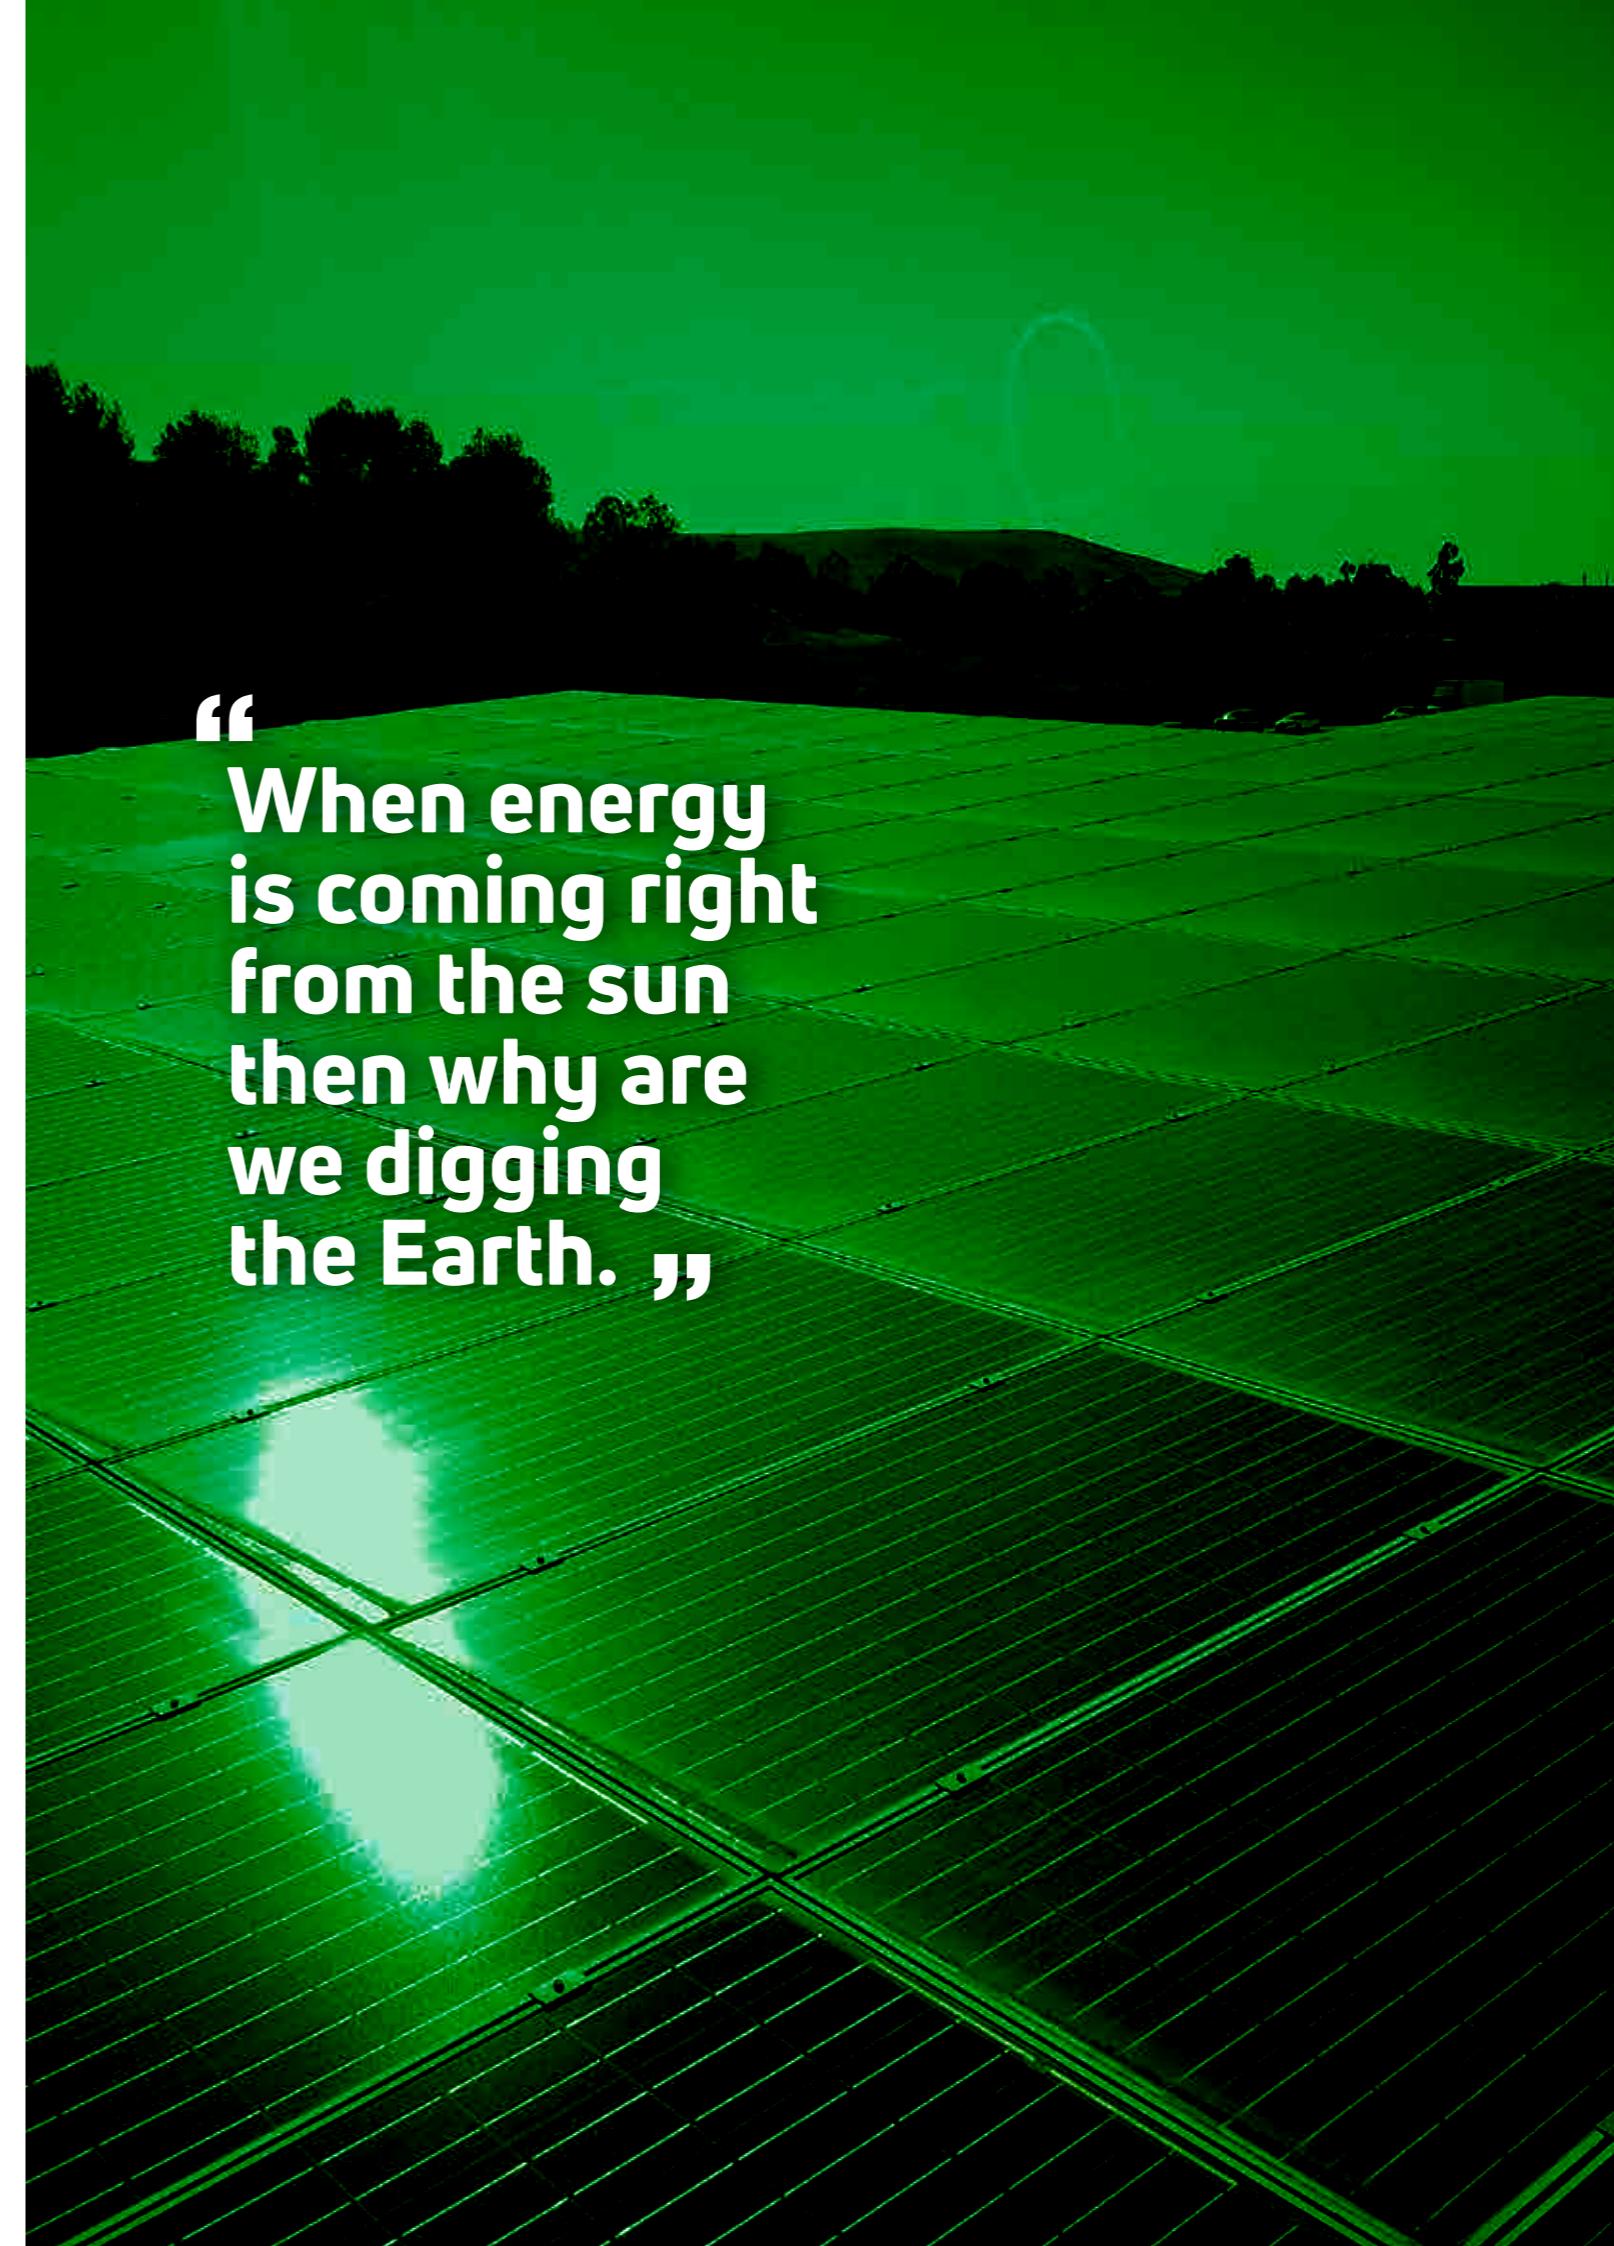

High yields, year after year planning on living in your home for more than three years?

We recommend you choose from our premium range of 'Tier 1' solar panels and European inverters. This will ensure you will continue to produce solar power well into the future, saving you more money in the long run. These systems produce more power, degrade less, are more reliable and have more comprehensive warranties – all of which are important in the long run.

Elite Range

The best that money can buy. No intention of moving house in the next five years or so? Perhaps you just demand the very best, or are considering batteries in the future. Consider our elite product range of European inverters, the best panels in the world and real-time energy monitoring. These systems offer an insight into your energy usage, are more efficient and are made from elite quality materials. With highly advanced technology backed by science, these products are designed to perform better in extreme heat and lower light. These systems don't pay for themselves straight away, but over the long term, their advantages are obvious.

“ When energy
is coming right
from the sun
then why are
we digging
the Earth. ,”

“A transition to clean energy is about making an investment in our future. ”

Gloria Reuben

Why Lakwell Industries make sense

Free inspection and energy consultation

If you are concerned of your energy costs or simply need to find out how a solar energy system could work for your home or business, simply contact us and set up an appointment at a convenient time for you. An energy consultant from Lakwell Industries will meet with you, study your electricity bills, visit the site and conduct a feasibility study on the best suited solar energy for your requirement and budget. All this will be provided free of charge and you will only need to submit your latest electricity bills to us.

System Installation

We are committed to ensuring that our customers are absolutely satisfied with our products and services. Thus we ensure that we provide efficient, unbeatable technical assistance via experienced and skilled technical officers/personnel to oversee every installation handled by Lakwell Industries. They ensure that it is carried out with minimum hassle and meet with the highest safety standards within the industry. The installation is then followed up with excellent after sales service, ensuring continuous monitoring of the performance of the energy system.

Efficiency monitoring and after sale service

The dedicated service staff at Lakwell Industries will monitor the web enabled solar systems installed at your home/business on a daily basis, generating a performance report which will indicate the amount of energy created by the system daily. Our monitoring portal helps you reduce operation and maintenance expenses by telling you when, where and how you need to act. Receive automatic alerts directly to your email inbox, and receive an overall view of the efficiency of the solar energy system so that you have better control and hands[1]on information/evidence of the return on your investment.

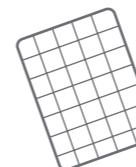

In addition to this unparalleled after-sales service and monitoring from Lakwell Industries, we also assure you a lifetime of 25 years on the solar panels and a 12-year warranty on the inverters. In the rare, if not unlikely event that your solar power system develops a fault, we will ensure that the issue is rectified promptly and efficiently, by our team of experts. What's more, our solar system installations are future-focused and planned in such a manner that would even allow you to easily expand the system for further capacity to meet greater demand of energy in the future by your household/business.

“ We have this handy fusion reactor in the sky called the sun; you don't have to do anything, it just works. It shows up every day ”

Delivering uncompromised quality components

Just like shopping for any major electrical appliance, brand, quality, warranty period and future maintenance costs should be considered when buying solar power products. Every product in our carefully-curated range comes from independently-rated suppliers and meets strict quality criteria.

World's Top Tier 1 panels

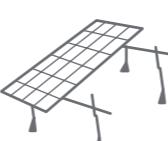

The world's most reputable inverters

State-of-the-art energy storage solutions

The added advantage of quality solar hot water

The safest isolators, racking, breakers & cabling

Our exclusive Longevity Guarantee

In the event you experience an issue with your solar power system and the product manufacturer is unavailable to assist you, Lakwell Solar's Longevity Guarantee means we will make good or find an equivalent replacement for your system within the original warranty period.

Hear from our customers

"Excellent service received from Lakwell. Very pleased with the results following the installation."

UHE GROUP, chairman,
Chamara Abeyratne

"I am very happy with the service and assistance received by Lakwell. Installing Solar panels in the home is no small feat but Lakwell guided me throughout the process and I barely felt any brunt of it."

Anisha Dharmadasa,
Deputy chairman of Nawaloka holdings

The Lakwell team installed solar panels in my home and it has since been fantastic and I am delighted with the results, the after service and the overall experience with Lakwell."

Upali Jayasinghe, DPJ GROUP, Chairman

"I am so grateful for the service I received from the Lakwell Team. They were efficient, friendly, experienced, and gave great advice for best optimisation in my factory".

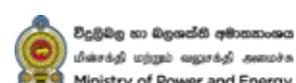

Asanka Rajapakse, Oil dredgers, Ship captain

"Solar system were repaired and serviced professionally at my factory. Lakwell is a very responsive company with good communication and I faced no issues whatsoever.

Evergreen Group, Chairman,
Aruna De Silva

"Installing Solar panels in my home was the first best decision I made and choosing Lakwell Industries for this was the second. They delivered on all their promises and I am very satisfied."

Omega Senerviratne,
Aeronautical Engineer
